

BUG HOTELS AT KEEPMOAT'S SITES, KEEPMOAT

BIODIVERSITY ENHANCEMENT OVERVIEW

Granby

Granby was the first constructed bug home. It was occupied the same day by bugs and the best looking entry form bug homes built on Yorkshire sites.

The Yorkshire site had not built any bug homes before and this one is now well established on site with even more bugs than when first constructed. The Site Manager said it went up for sale at 3pm and was sold straight away

Scotswood

Keepmoat have constructed a Bug Hotel which was built by our very own apprentice joiner in a new compound which is currently in progress.

To occupy this bug hotel the team received some plant seeds from their local SHEQ advisor to revitalize the surrounding area in the new compound.

Fact box

Company name:

Keepmoat

Project name:

Bug hotels at Keepmoat's sites

Location:

- Yew Gardens, Granby, Yorkshire
- Scotswood, Newcastle
