

**THE GLEBE  
LONDON, UK  
Brookfield Multiplex**

**BIG Biodiversity Challenge Award category:** Temporary

**Project overview**

Flowerful Site Entrance

Project and Site team, approximately 8 people, volunteered for the completion of this project.

The materials used were recovered from the landscaping works on site and the flowers were donated by the landscaping contractor.

**What were the biodiversity conditions on site, prior to the enhancement?**

A hard-standing pathway.

**Were there any specific conditions that led to you carrying out this work?**

To promote biodiversity and environmental awareness by engaging site and project teams. A small step towards offsetting some of the construction phase carbon.

**What were the biodiversity measures taken?**

The office-based commercial and management teams, engaged with the Site managers and workers from the landscaping and logistics contractors for the completion of this project.

The materials used were recovered from the landscaping works on site and the flowers were donated by a site contractor.

All team members happily committed on the project, volunteering some of their personal time after a working day/shift.

Flowerful Site Entrance

### How would you best describe the project?

An enhancement

### Further information

The office-based, commercial team members communicated the idea to the site trades interested to volunteer. A site contractor donated the flowers for the project and excess landscaping materials were recovered from the construction works to be reused.

All team members, project office and site team, gathered in the end of the day/shift for planting the flower pots to be placed at the site entrance. A talk delivered to communicate the concept of the project and it was confirmed that every day a different trade will be responsible for the watering of the flowers.

### What was your personal motivation for carrying out the enhancement?

To promote environmental awareness and sensitivity by engaging site and office-based team members.

*Daily watering in shifts*

*Graduate engineer, Site Manager*
